Video / working title	Version	Review date

Fictional example: a desk-drawer video

Plan: a short video about sorting a desk drawer. The sample script says 'four sections.' The creator still needs to check that line against the footage, record asset permissions and choose a publication date.

1 Idea and viewer

Video idea + intended viewer + source of the idea.

2 Sources, permissions and script facts

Claim to check + source reference + permission + needed correction.

3 Title and thumbnail test

Title options + thumbnail fit + observation at a small display size.

4 Assets and synthetic material

Asset/source + permission + AI-made or altered material + viewer context.

5 Approval and calendar

Reviewer + final file/version + planned publication date + next check.

6 Measurement and next test

Check date + metric or feedback + observation + next change to test.
